

## **Impact of the Practices of the Automobile Industry on Health: Selected References**

Corporations and Health Watch is conducting a search for articles that assess the impact of corporate practices on health for various industries. This list includes selected publications from the peer-reviewed literature that describe and analyze the marketing, product design, retail and pricing practices of the Automobile industry. We invite readers to submit additional references from the peer-reviewed or “grey” literature by sending them to [response@corporationsandhealth.org](mailto:response@corporationsandhealth.org).
